The figure displays a grid of 20 bar charts, each representing the monthly precipitation (mm) for a specific year from 1992 to 2020. The charts are arranged in two columns. The left column contains years 1992, 1994, 1996, 1998, 2000, 2002, 2004, 2006, 2008, 2010, 2012, 2014, 2016, 2018, and 2020. The right column contains years 1993, 1995, 1997, 1999, 2001, 2003, 2005, 2007, 2009, 2011, 2013, 2015, 2017, and 2019. Each chart has a y-axis ranging from 0 to 100 mm and an x-axis with months labeled Jan through Dec. The bars are gray with black outlines. The data shows significant inter-annual variability in precipitation patterns, with some years (e.g., 1998, 2009) showing higher overall precipitation and others (e.g., 2003, 2015) showing lower overall precipitation. The distribution of precipitation throughout the year also varies, with some years having more uniform distribution and others having distinct wet or dry seasons.
